

## Draft Agenda

### Parks and Green Spaces Committee Meeting

Wednesday, October 12, 2022

We will meet at 4 PM with the Buffer Project engineer group at the buffer at Montgomery Street. The plan is to do an on-site “walk through” to learn about the study that they’ve done and to discuss their preliminary recommendations for the Buffer area. The weather report looks good so we can then proceed to Western Grove Park to continue with a short meeting.

Discussion of the “State of the Parks” excel forms that Susan Kilborn has prepared for each of us to use when reporting on the parks under our “care”. The forms will be sent to your email address where they can be used to write a report before each meeting or if there is an immediate problem. Copies will be sent to the Village Office and to the co-chairs.

No further meetings scheduled in 2022 with the important exception of the annual boxwood trimming in December to supply greens for the CC Garden Club to use when decorating the Village Hall for the Christmas celebration.

And, finally, a big thank you to those who donated delicious refreshments to the September Honeybee talk.
