COVID-19 Testing
Montgomery County Discontinues its Testing Sites;
Information Regarding Alternate Facilities

On Tuesday, August 18, Montgomery County announced that it had terminated its contract with *AdvaGenix*, a Rockville-based company that been the county's provider of COVID-19 testing. This contract termination followed concerns raised by the State of Maryland regarding *AdvaGenix*'s testing and lab process. The county has reopened testing sites using alternate testing methods, which supplement privately-managed facilities available throughout the county and state.

The county's August 18 Press Release can be viewed here:
