Chevy Chase Village

Project and Expenditure List

Projects:

Infrastructure

- Street Maintenance and Repair Program
- Sidewalk Maintenance Program
- Streetlight Upgrades
- West Kirke Street and Laurel Parkway Intersection Improvements

Public Safety

- Public Safety Technology and Equipment

Public Spaces

- Western Grove Park Development
- Laurel Park Hydrology and Engineering Study

Village Hall/Office

- Village Corporate Limits Boundary Survey
- Website Redevelopment

Expenditures by Department:

General Government

- Equipment:
 - Village Computer Server Replacements
 - Tuohey Conference Room Sound Improvements
- Vehicles:
 - Admin. Vehicle Replacement

Public Safety

- Communications Equipment:
 - Mobile Data Terminals
 - Police Radios
- Vehicles:
 - Police Cruiser Replacement (x3)
 - Hybrid Surveillance Vehicle

Public Works

- Equipment:
 - Leaf Vacuums (x2)
 - Replacement Salt Spreader
 - Water Tank
- Vehicles:
 - Pick-up Trucks (x3)
 - Medium-duty Dump Trucks (x2)
 - Rear-load trash/yard Waste Truck
 - Skid-Steer Loader

Project and Expenditure Summary

Projects:

	Duration/ Remaining	Estimated Cost	Funding Source	Construction Ready Date (Est.)	Status
Sidewalk Maintenance Program	Ongoing	\$3,500/year	SS	Ongoing	Ongoing
Street Maintenance & Repair Program	Ongoing	\$111,000+/year	SS	Ongoing	Ongoing
Streetlight Upgrades	Ongoing	\$10,000	SS	FY2016 – FY2021	Ongoing

Description

This ongoing project will proactively maintain and repair Village sidewalks.

Estimated Schedule

This is an on-going maintenance activity.

Cost Change

There have been no cost changes to this project.

Justification

This project will maintain and increase pedestrian safety on all Village sidewalks and promote safe access throughout the Village. As a result of the increased pedestrian safety this activity is eligible for funding under the *SafeSpeed* program.

Labor/Maintenance			0	0	0	0	0	0	0
Materials/Equipment			0	0	0	0	0	0	0
Total			0	0	0	0	0	0	0

Description

This project provides for the on-going maintenance and repair of the Village's roadways, curbs and storm drainage infrastructure using concrete and hot mix asphalt. The Village maintains a total of 8.1 miles of roadway or 27 lane miles. Based on current funding levels all Village roadways would be repaved on a revolving 20-year basis.

Estimated Schedule

The Village's street maintenance and repair program typically runs from April through October because the material used will not set properly if temperatures are below 60 degrees.

Cost Change

Normal funding allocations in FY17 and beyond are forecasted. The Village's street maintenance and repair contract was recently rebid and FY17 and beyond budgeted figures reflect increased costs due to higher labor costs, oil price volatility and the Village's living wage policy.

Justification

The street maintenance and repair program will ensure the Village's infrastructure is kept at an acceptable level as well as providing safe traverse for pedestrian and vehicular traffic and is eligible for funding under the SafeSpeed program.

Description

This program serves to enhance and upgrade existing street lights in addition to installing new LED streetlights in identified dark areas, thereby creating safer pedestrian and vehicular access throughout the Village. The program also monitors technology developments regarding LED streetlights as well as potential incentive programs and fluctuations in PEPCO tariff rates. LED tariffs have remained unchanged since July 2014.

Estimated Schedule

This is an ongoing program.

Cost Change

There have been no cost changes to the project.

Justification

This program serves to enhance and upgrade existing street lights in addition to installing new streetlights in identified dark areas, thereby creating safer pedestrian and vehicular access throughout the Village. As a result of the increased pedestrian, vehicular and public safety, this project is eligible for funding under the *SafeSpeed* program.

Description

This project studied the traffic flow at the intersections of Connecticut Avenue, Laurel Parkway, West Kirke Street and West Lenox Street (in front of the Post Office) for potential traffic flow and safety improvements. Improvements that were investigated include, but are not limited to, the construction of a traffic island on West Kirke Street; traffic flow modifications along Laurel Parkway and sidewalk improvements in the adjacent West Kirke Street/Laurel Parkway combined public right-of-way. As part of the project, a traffic engineering firm was retained to evaluate and design proposed changes.

Estimated Schedule

This project is scheduled to be complete prior to the end of FY16.

Cost Change

Due to higher than expected construction bids the overall project total has been increased by \$44,000.

Justification

This project will address several safety concerns of the existing intersection to improve vehicular and pedestrian traffic through the intersection and is therefore, eligible for funding under the SafeSpeed Program.

Coordination

Board of Managers
 General Government
 Public Works Department
 Maryland State Highway Administration
 Historic Preservation Commission

Total			6	1	1	1	1	1	1

Description

This project would further enhance Village Police Department's strategies and practices to prevent and reduce crime throughout the Village as supported by the Village Public Safety Committee. Currently being explored are body-worn cameras, wireless fingerprint readers, GPS-enabled bait items, improved first aid equipment and other crime-fighting equipment to support officers' efforts to deter crime and respond to emergencies.

Estimated Schedule

This is an ongoing project. As emerging technologies and/or equipment come to our attention, we will investigate them to determine whether their use may be beneficial/feasible in improving efficiency or reducing crime in the Village. In the upcoming fiscal year, it is anticipated that modest expenditures may be made to augment and enhance the Village Police Department's crime fighting strategies and practices.

Cost Change

There have been no cost changes to this project.

Justification

This project would enhance and upgrade the existing crime fighting strategies and practices creating safer pedestrian and vehicular access throughout the Village. As a result of the relationship to public safety, this project is eligible for funding under the *SafeSpeed* program.

Materials/Equipment			0	0	0	0	0	0	0
Total			15	0	3	3	3	3	3

Description

This project will develop the Western Grove Park into developed open space. A facility plan for the park has been approved by the Village and County Planning Board. The open space will include the installation of benches, pathways, pedestrian lighting, a seating/picnic plaza, a natural playspace area and native plantings. The installation of sidewalks and pedestrian lights will provide safe pedestrian access from the Village to mass transit facilities and the commercial/retail space in Friendship Heights and the Chevy Chase Center retail property.

Estimated Schedule

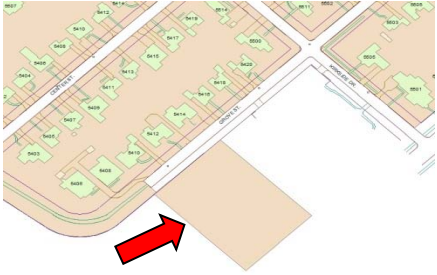

The project is currently in the construction phase and is being jointly funded between the Village and the Maryland-National Capital Park and Planning Commission (M-NCPPC). It is anticipated that the design/build process will straddle FY16 and FY17, however the Village's 25% contribution will be due in FY16.

Cost Change

The Village and M-NCPPC have partnered to expedite the park development. The Village's contribution pledge is 25% of the total design/build cost, which is consistent with the Village's level of effort thus far in the development process.

Justification

In August 2002, the Village entered into an MOU with Montgomery County and M-NCPPC to acquire the former Wohlfarth property to preserve it from future commercial/residential development. As stipulated in the MOU the Village contributed \$1.25 million towards the property's acquisition and for the collaborative rights to assist and provide input on the property's uses and development.

Description

This project will study the water runoff and flow through Laurel Park and the existing “rain garden” located at the south end of Laurel Park. Sections of the stream bed have been experiencing erosion due to the increased severity of weather events in recent years and the installation of two (2) curb inlets that were installed at the south end of the park back in 2011. The study will determine what mitigation measures should be implemented to slow the velocity of storm water entering the park, and how adjacent roadways should be protected from stream bank cut back. The study will also review the overall placement of the existing “rain garden” to determine the most effective location and proper design to maximize its potential to filter storm water runoff.

Estimated Schedule

This project is currently in the planning phase. However, after consultation with Montgomery County Department of Environmental Protection (DEP) personnel, the opportunity exists to partner with the County in support of the design and construction of the project. Accordingly, the project has been deferred until FY19. DEP personnel have visited the site and do not believe there is an immediate hazard, however, DEP staff are continuing to monitor the area.

Cost Change

There have been no cost changes to this project.

Justification

This project will protect the park from further erosion, which over time will threaten the stability of northeast portions of Laurel Parkway where the stream bed has begun to undercut the hillside adjacent to the roadway.

Description

As part of the completed review and revisions to the Village Charter, the project would resurvey and confirm the corporate limits of the Village. As part of the survey effort a professional land survey firm would be retained to research and confirm the Village's corporate limits. *At the Board's direction this project was removed from consideration.*

Estimated Schedule

At the Board's direction the project was cancelled.

Cost Change

At the Board's direction the project was cancelled.

Justification

At the Board's direction the project was cancelled.

Description

This project will re-develop the Village's website to provide for greater ease of navigation, content updating and additional functionality. This re-development will address the following technical issues, limitations and allowing for additional functions to be integrated with the website:

1. Website display on mobile devices and smartphones
2. Integration with the Village resident directory (to allow directory updating directly through the website), blast e-mail and other social media functions
3. Ability to submit online service requests
4. Online polling/surveys
5. More responsive search function
6. Address various programming errors and bugs in the current background programming of the site

The Village's website was last re-designed in 2010 at a cost of \$12,500.

Estimated Schedule

This project is estimated to be complete by the end of FY16.

Cost Change

There have been no cost changes to this project.

Justification

The Village's website was last re-designed in 2010. Since that time there have been many additional features that have become available, however, due to the current content management system used for the site, many of these features can't be implemented without a re-design of the internal structure of the site.

Labor/Maintenance			0	0	0	0	0	0	0	0
Materials/Equipment			0	0	0	0	0	0	0	0
Total			0	0	0	0	0	0	0	0

Description

This equipment will ensure the continuity of operations of Village government. Due to the need for this equipment to be used by other departments in the support of the Village *SafeSpeed* program a certain percentage of the expenditures would be eligible to be paid out of the *SafeSpeed* revenues.

- Village Computer Server: The Village's main file/police records management server was replaced due to its age and the Village's accounting system software was updated to remain compatible with software requirements and security protocols.
- Tuohey Conference Room Sound Improvements: At the October 12, 2015 regular meeting the Board unanimously voted not to pursue installing acoustical sound panels in the Tuohey Conference.

Estimated Schedule

This equipment would be purchased on an as needed basis and as the equipment's lifespan dictates and pursuant to the Village's Equipment Plan.

Cost Change

There have been no cost changes

Justification

This equipment as described above would ensure the continuity of operations of the Village government as well as ensuring that State mandates are met through record retention and preservation. Equipment will be purchased pursuant to the Village's Equipment Plan.

Coordination

Total			-6	-2	-2	-2	0	0	0

Description

This vehicle is used by all general government staff, including the Director of Municipal Operations and Permitting and Code Enforcement Coordinator for travel to and from meetings, code enforcement patrols, capital projects supervision and meeting/event preparations. The current administrative vehicle is a SUV. This vehicle has also now been commissioned as an alternate Police response vehicle when the need arises.

Since this vehicle is used in the supervision of the Village's *SafeSpeed* capital projects as well as being a spare first responder vehicle a certain percentage of the costs would be eligible to be paid out of the *SafeSpeed* revenues.

Estimated Schedule

Currently there are no plans to replace the Administrative vehicle within the duration of this CIP.

Cost Change

Currently there are no plans to replace the Administrative vehicle within the duration of this CIP.

Justification

Replacement will be in accordance with the Chevy Chase Village Vehicle Operational Plan.

Labor/Maintenance			0	2	0	0	0	0	0
Materials/Equipment			0	0	0	0	0	0	0
Total			0	2	0	0	0	0	0

Description

This equipment will ensure the continuity of operations of Village government while ensuring that the services Village residents have come to rely on such as emergency response, 24/7 police patrols, house checks, speed and stop sign enforcement continue without interruption. Due to this equipment being used for public safety needs, the expenditures would be eligible to be purchased with *SafeSpeed* revenues.

Estimated Schedule

Radios: Replacement is required due to technology advancements¹. The lifespan of the radios is approximately 10 years.

MDCs: Expected lifespan is 4-5 years maximum.

Recording System: Replacement was accomplished in FY14 and was required due to technology advancements and the lack of available replacement parts for the Village's old recording system.

Justification

This equipment will ensure the continuity of operation of Village government while ensuring that the services Village residents have come to rely on such as 24/7 police patrols, house checks, speed and stop sign enforcement continue.

- All public safety radios must be replaced due to mandated technology changes (new frequencies and encryption) that will take effect in approximately 2 years. Our portable radios have already been replaced (FY12). In FY17, we seek to replace the 1 fixed base station radio in the Communications Center, and 5 fixed radios in the police cars (3 marked cruisers, 1 unmarked sedan, 1 dual-use SUV) so that they will be compatible with the new technology. While our portable radios are good, we continue to experience performance problems when using them in certain parts of the Village.
- MDCs have an expected lifespan of 4-5 years, and we are scheduling their replacement in FY18.

Coordination

- Board of Managers
- General Government
- Police Department
- Public Safety Committee

¹ Portable radios for the officers were purchased in FY12. Purchase of in-car radios was deferred at that time pending build-out of the County's infrastructure to ensure equipment reliability.

EST. OPERATING BUDGET IMPACT (dollars in thousands)

Labor/Maintenance			-10	0	-2	-3	-2	-2	-1
Materials/Equipment			-10	0	-2	-3	-2	-2	-1
Total			-20	0	-4	-6	-4	-4	-2

Description

These vehicles will ensure the continuity of operations of Village government while ensuring that the services Village residents have come to rely on such as 24/7 police patrols, house checks, speed and stop sign enforcement, continue uninterrupted. The cost for a police cruiser is all inclusive of any equipment needed such as a light bar, decals, push bumper, siren, spotlight and all installation costs. Due to these vehicles being used for pedestrian, vehicular and public safety needs, the expenditures would be eligible to be paid out of the *SafeSpeed* revenues.

Estimated Schedule

Vehicles are purchased pursuant to the Village's Vehicle Operational Plan. Specifically, marked cars are to be replaced by the time they are five service years old. The hybrid surveillance car receives lighter use, and according to the Plan, it is to be replaced on an as-needed basis. We have scheduled its replacement plan to replace it in FY20 (although this may change if unforeseen problems arise with that car); it will be over 9 years old at that time.

Cost Change

On the assumption that there will be some market increases, the price projection for fully-equipped police cars is \$2,000 more in FY19 and FY20.

Justification

These vehicles will ensure the continuity of operation of Village government while ensuring that the services Village residents have come to rely on such as 24/7 police patrols, house checks, speed and stop sign enforcement are maintained.

Labor/Maintenance			-6	0	-1	-1.5	-1.5	-1	-1
Materials/Equipment			-3	-0	-0.5	-0.5	-1	-0.5	-0.5
Total			-9	-0	-1.5	-2	-2.5	-1.5	-1.5

Description

This equipment will ensure the continuity of operation of Village government while ensuring that public works services such as snow plowing operations, special (bulk) pick-ups, yard waste collection, tree planting and leaf collection are maintained. Due to the need for some of this equipment to be used for pedestrian, vehicular and public safety needs, a certain percentage of the expenditures would be eligible to be paid out of the *SafeSpeed* revenues.

- Salt Spreader: The proposed replacement spreader will be made of stainless steel to match the other two (2) salt spreaders in the Village's fleet. Although stainless steel is slightly more expensive than traditional steel spreaders, they do not rust as a result of the salt exposure and other abrasives. The proposed replacement spreader will be powered by an electric motor (run by the pick-up truck's alternator) rather than a gas-powered motor. In the past we have had difficulty starting the gas motors in very cold weather and dealing with engine breakdowns during storm responses. Many surrounding jurisdictions have encountered the same issues and have begun to switch their fleets to electric motors. The Village also has two (2) electric motor spreaders purchased in FY2015 and FY2016 and we have experienced very good reliability. These electric spreaders can also be safely stored inside the bay without presenting a potential fire hazard (the gas motor spreaders are stored in the Public Works Yard for this reason).

Estimated Schedule

This equipment would be purchased on an as needed basis and as the equipment's lifespan dictates. Equipment will be purchased pursuant to the Village's Equipment Operational Plan. The Village's second leaf vacuum has been performing well, therefore replacement originally scheduled for FY17 has been deferred until FY18 at which time replacement will be re-evaluated.

Cost Change

There are no changes in cost.

Justification

This equipment will ensure the continuity of operation of Village government while ensuring that that public works services such as snow plowing operations, special (bulk) pick-ups, yard waste collection, tree planting and leaf collection are maintained.

Coordination

EST. OPERATING BUDGET IMPACT (dollars in thousands)

Labor/Maintenance			-16	-2	-2	-2	-2	-3.5	-4.5
Materials/Equipment			-6	-1	-1	-1	-1	-1	-1
Total			-22	-3	-3	-3	-3	-4.5	-5.5

Description

These vehicles ensure the continuity of operation of Village government while ensuring that public works services such as snow plowing operations, special (bulk) pick-ups, yard waste collection, sidewalk repairs and leaf collection are maintained as outlined in the Chevy Chase Village Vehicle Plan. Due to the need for these vehicles to be used for pedestrian, vehicular and public safety needs, a certain percentage of the expenditures are eligible to be paid out of the *SafeSpeed* revenues.

- Medium-duty dump trucks: In years FY18 and FY19 the Village's projects to replace its two (2) medium-duty dump trucks. The Village currently maintains two (2) medium-duty dump trucks of varying carrying capacities. It is projected that the smaller of the two (2) would be replaced in FY18 and the larger in FY19. It is required that the larger of the two (2) dump trucks be replaced or maintained due to it required need to transport salt from County and State facilities to the Village in winter weather and leaf collection operations.
- Skid-Steer Loader: In FY17, the Village tractor/loader is scheduled for replacement. Instead of purchasing an identical replacement, staff is recommending replacement with a skid-steer loader ("Bobcat"). The skid-steer loader is more ruggedized, has a larger carrying/lift capacity, and it has a significant number of attachments that can be rented to assist in various Public Works functions, including an auger, street sweeping broom and snow blower.

Estimated Schedule

Vehicles would be purchased on an as-needed basis and in accordance with the Chevy Chase Village Vehicle Operational Plan. The Village's small dump-body truck has been performing well, therefore replacement originally scheduled for FY17 has been deferred until FY18 at which time replacement will be re-evaluated.

Cost Change

The cost associated with replacement of the skid-steer loader has been adjusted up by \$5K due to market increases.

Justification

These vehicles will ensure the continuity of operation of Village government while ensuring that Village public works services such as snow plowing operations, special (bulk) pick-ups, yard waste collection, sidewalk repairs and leaf collection. Replacement will be in accordance with the Chevy Chase Village Vehicle Plan.
